

## EDUCATION

---

- **Pompeu Fabra University** Barcelona, Spain  
*Ph.D. in Distributed Systems and Security; Marie Curie Fellowship, EU H2020* *Oct. 2019 – Present*
- **Birla Institute of Technology and Science** Pilani, India  
*Masters of Engineering in Computer Science* *Aug. 2015– July. 2017*
- **Maharshi Dayanand University** Rohtak, India  
*Bachelors of Technology in Computer Science* *Aug. 2009– July. 2013*

## EXPERIENCE

---

- **Nokia Bell Labs** Paris, France  
*Research Intern, Blockchain Security Group* *Oct 2019 - Present*
  - **Blockchain Security:** Blockchain Security project related to the IoT devices running on propriety blockchain solution.
  - **Lightweight Protocols:** Making resource intensive blockchain solution resource efficient for a plethora of usecases.
- **Linkoping University** Linkoping, Sweden  
*Research Assistant, under [Prof. Andrei Gurtov](#)* *Feb 2019 - Aug 2019*
  - **Decentralized Systems:** Systems where one or more components are decentralized to avoid the single point of failure.
  - **Profiling IoT:** Profiling of the IoT devices connected and reachable via the internet using tools such as Shodan and labelling the observation according to the known vulnerabilities.
  - **IoT Risk Assessment:** IoT devices deployed in legacy systems and mission critical domains could expose greater risk if they are using vulnerable or unpatched protocols.
- **EMC<sup>2</sup>(Now DellEMC)** Pune, India  
*Software Engineer, Protocols Group(SMB)* *Jul 2017 - Jan 2019*
  - **NAS box:** Network-attached storage(NAS) is a file-level computer data storage server connected to a computer network providing data access to a heterogeneous group of clients.
  - **SMB/CIFS Protocol:** A communication protocol for providing shared access to files, printers, and serial ports between nodes on a network, widely used with Windows products.
  - **CIFS RFC Features:** Developing Features which are made part of the CIFS/SMB related RFCs. Bypassing the open-source code and developing in-house protocols features.
  - **Agile Development:** Agile practices involve discovering requirements and developing solutions through the collaborative effort of self-organizing and cross-functional teams and their customer/end user.
- **Google Summer of code(GSoC)** Remote  
*Student Collaborator* *May 2017 - Jul 2017*
  - **HPX:** HPX is a C++ Standard Library for Concurrency and Parallelism. It implements all of the corresponding facilities as defined by the C++ Standard.
  - **Stack Overflow detection:** A stack overflow error can occur in a computer program due to excessive memory usage. Stack overflow is general error in linux, which could be cause by segmentation fault also.
- **EMC<sup>2</sup>(Now DellEMC)** Pune, India  
*Software Engineering Intern, DDOS Group* *Jan 2017 - Jun 2017*
  - **DD OS:** The Data Domain Operating System (DD OS) is the intelligence that powers Dell EMC Data Domain boxes used for data backup, archive and long term retention.
  - **Services Debugger:** To avoid setup issues, service debugger checks the client side setup and software configurations for smooth operations.
  - **Central Configurator:** A program which monitors each and every service(bounded by existing rules) if they are setup and configured correctly. A security layer working in conjunction makes the product resist of manual errors and network attacks.

**Application Development Intern**

- **Hybrid Application:** Hybrid apps are deployed in a native container that uses a mobile WebView object. When the app is used, this object displays web content thanks to the use of web technologies (CSS, JavaScript, HTML, HTML5).
- **E-commerce inventory:** E-commerce inventory management is the act of measuring the amount, location, pricing, and mix of products available from your business. Through e-commerce inventory management, businesses know what products are overstocked, in stock, understocked, and out of stock

**AWARDS AND ACHIEVEMENTS**

- **Winner IC3 Blockchain Camp:** 1st Prize *IC3 Blockchain Camp* 2020(July-Aug) hosted by IC3 and Cornell University
- **Winner IMDEA Hackathon:** *Blockchain Hackathon* at IMDEA Software Institute in Madrid, Feb. 2020
- **Winner Copernicus Hackathon:** *Student prize* at Copernicus Hackathon held at Science Park in Graz on 15-16 Oct., 2020
- **Academic achievement:** Stood in top 40 students among 10000 students appeared for BITSAT-HD, Merit Scholarship cum. 40% Fee Waiver at BITS Pilani, National Eligibility Test (NET-exam) qualified in first attempt, GATE exam qualified, 3rd position in *Codility Titanium 2016 Challenge*, Semifinalist in HackerRank University World Cup 2015
- **Others:** Reported bug in payment process platform *ccavenue*(discrepancy with payment module), winner of few college level technical events

---

**PROGRAMMING SKILLS**

- **Languages: Proficient in:** C, C++, Python, Solidity, Git, bash, TeX      **Basic to Moderate ability in:** Lisp, Java, JS, R
- **Industry Software Skills:** Wireshark, mininet, ns-2, Omnet++, Django, Flask, Android SDK, MySQL MongoDB, Docker, Raspberry Pi and more

---

**EXTRA-CURRICULAR AND INTERESTS**

- Certified Scrum Master, by Scrum Alliance Certificate ID 000837249
- Fast Sudoku and Rubik's cube solving, flying glider planes, avid reader, into board-games, culinarian.
